Dear Sirs,

I am writing regarding the Underground Utilities Project. I did vote originally to accept it. I was persuaded to accept it and told we really didn't have a choice. But now I realize that we do have a choice and I would like to say that I do not agree with the Underground project. I was and still do not have a clear amount of money that this will cost me personally. I also realize that the financial times have changed since this whole thing was started. I for one cannot afford to have any added expenses and still be able to hold on to what I have worked so hard for. As you know the whole country is in a recession, California has been hit especially hard. I have 3-4 friends that will also lose everything they have worked for if they get a bill like they are proposing for Hillcrest Bay.

I agree that we all bought our homes in Hillcrest Bay with the wires there already, and they didn't bother us then. So why now??

I again would like to say the I am opposed to the Underground Utilities and what to change my vote to NO.NO.NO.

Sincerely  
Judith Shipley
